EDUCATION

B-Tech in Computer Science Engineering-Internet of Things

Oct 2023 - June 2027

8.99 CGPA

VNR Vignana Jyothi Institute of Engineering and Technology

TECHNICAL SKILLS

Programming and CS: C++, Python, Data Structures

Web Developemnt : HTML, CSS , JavaScript ,NodeJS

AI / ML: RAG , NLP , OCR and Computer Vision

Cloud and Tools: Git, GitHub, MongoDB, MySQL, Firebase, Power BI , MS Excel, VSCode

EXPERIENCE

Abhinavana Technologies, : Developer Intern

August 2025 – Jan 2026

- Building a **RAG pipeline** integrating **NLP** and **vector databases** for document-based topic-wise Q&A with source attribution.
- Optimizing **semantic chunking** and **vector search tuning**, for achieving **95%** retrieval accuracy and response latency in **2 sec**.

College Website Team, : Student Web Contributor [\[Link\]](#)

May 2025 - July 2025

- Collaborated with a team of 5 to debug, maintain, and develop a web server using **NextJS**, including designing the homepage for an upcoming conference at our institute.

PROJECTS

Smart Pocket [\[Link\]](#)

- Designed SmartPocket, a **AI voice-enabled** personal finance assistant that tracks expenses, savings goals, and transactions using natural language input.
- Integrated React, **TypeScript** with **Express + MongoDB** backend, enabling users to add transactions and savings goals manually or via voice commands. Achieved **100+** positive responses in pilot survey with **50+ users**

Vocal Eyes

- Developed **VocalEyes**, an AI-powered mobile assistant using **Gemini** for the visually impaired that identifies objects and text from the environment and gives audio output.
- Implemented **Google Cloud Vision API** for object detection and **OCR**, integrated with **Google Cloud Text-to-Speech API** to deliver natural voice guidance via earphones.
- Reached **70%** object detection accuracy on a **range of 5-6 meters** and processed 50+ images samples

ACHIEVEMENTS

- Microsoft's** Code Cubicle 4.O Hackathon **1st Runner-Up** ,Hyderabad
- Second Prize **Winner-Google Developer** Groups GDGC-CVR "Solution Challenge" Hackathon 2025
- Semi-Finalist in **CODENOX Coding** contest conducted by Turing Hut 2024
- Shortlisted for taking part in 24- hour Hackathon , Devastra 2K25 and been active in designing solution
- 2nd Runner up - Hult Prize Competition** 2023 - VNR VJIET presenting an idea on creating a web application on Pothole patching.

EXTRA - ACTIVITIES

- Developer & Website Administrator**, VJSV – The Telugu Literature Club.
- Coding Enthusiast**, Consistent on Leetcode , CodeChef, **Smart Interviews** Solved over 100+ DSA problems
- Lead Presenter**, effectively Communicating project vision during Code Cubicle, Google Solution Challenge, .
- Hosted and guided the jury panel for **Krithoathon 3.0**, organized by Soven Developers at VNR VJIET
- Selected as Internal Round Participant, **Smart India Hackathon** 2024
